

MATRIX

High volume dining outlets require foodservice equipment that stands up to repeated use while maintaining an attractive appearance. BSI developed its Matrix line of food shields precisely with this in mind — employing durable, bent tube framing and sturdy hardware to withstand the rigors of use in restaurants, schools, convenience stores, and retail outlets.

Matrix is available in dozens of styles and a variety of colors that allow you to create a distinctive serving area without the expense of a customized design. The classic look of BSI's glass clip hardware discreetly and securely holds tempered glass in place. Engineered with safety in mind, Matrix features a minimal gap between the post and glass edge to reduce contact points.

BENEFITS:

- Affordable, classic design makes Matrix ideal for multi-unit restaurant, grocery, and c-store locations.
- Substantial, bent tube framework offers a durable visual without sharp edges or obstructive hardware.
- Available in numerous configurations for full or self-service dining.
