

# VIPER

Viper food guards feature the rare combination of dynamic design and value-driven engineering for modern dining facilities. The unique E-Track System allows the sneeze guards to follow the curves of any serving counter, while the low-profile, modern hardware gives Viper its signature look. The fully adjustable vertical and horizontal movement makes transitioning between full and self-service operations easy for foodservice personnel. When flexibility and style are priorities for your dining space, choose Viper.

## BENEFITS:

- Ideal for upscale designs that utilize curved counter configurations.
- Easy adjustment for simple transition between self and full-serving dining.
- Bent tube frame construction presents a clean, hardware-free visual with substantial durability.
