

AXCES™

Pivot-Action Food Guards

Axces™ sneeze guards address the essential components of shield design — adjustability, cleanability, and simplicity, without compromising construction quality. Thoughtfully engineered to maximize your staff resources, Axces' patented pivot action and soft-shut closure allow a single operator to quickly and safely replenish food and maintain the cleanest and safest of dining environments. Quality tested for the rigors of high-volume use, Axces guards embody the durability and design that distinguish BSI products in the foodservice industry.

Warmers

BENEFITS:

- Patented pivot action with upward resting point offers convenient access to food lines for replenishment and menu transition.
- Soft-shut closure allows a single person to safely and quickly return the guard to the serving position.
- Cleaning guards has never been easier — simply flip, wipe, and nudge the glass to initiate return to the resting, self-serve position.
